EXPERIENCE

WEB D SCHOOL

2022 - Present

Full Stack Developer

For teachers, administrators, and students, the system provides safe login authentication. By gathering the required data, including name, email address, contact information, and course details, administrators can quickly register new students. Administrators may effortlessly register new students by gathering the required data, including name, email address, contact information, and course details. Administrators are in charge of assigning teachers, managing course scheduling, and creating, updating, and deleting courses.

SOFTSUAVE

2021 - 2022

Full Stack Developer

Effective scheduling of doctors, covering availability, consultations, and leave requests. Depending on the doctor's availability, patients can book appointments online and get confirmations. Create invoices to support smooth billing procedures for patient consultations, treatments, and services provided. Use reminders, notifications, and messaging to help doctors, staff, and patients communicate with one other.
